

mhin data

Michiana Health Information Network

mhin data – securely stores clinical information about your patients and electronically delivers results to your customers.

features

- Historical, patient-centered repository established in 1999
- Storage and access for all of your patient information
- Provides a consolidated interface to physician practice systems
- Robust and secure technology infrastructure to safeguard data
- Sophisticated patient matching tools and interface transaction monitoring
- Complete data center services – including processing, backups, and upgrades
- Participation in a community-wide health information exchange

benefits

- Improves care: Physicians can make better care decisions with a complete view of results and other patient information
- Saves time: Staff can do their jobs rather than looking for results or monitoring technology
- Saves money: Shared, cost effective managed technology platform for organization use and system redundancy

mhin data's unique advantages

- One connection and one contact for dozens of data feeds
- Complete integration with the community health information exchange
- Cost effective results distribution – minimizes supplies, mail and courier expenses; eliminates help desks and associated costs
- Significantly reduces time, expense and aggravation interfacing with external systems
- Experienced, dedicated team that designs, installs and monitors interfaces
- Professionally managed, state of the art data center
- Hassle-free maintenance and dedicated, 24/7 help desk
- A local company dedicated to connecting healthcare in our community
