mhin interface – already have an EHR? mhin interface delivers discrete, digitized results to your EHR and connects your internal, stand-alone systems.

features

- Interface services to connect your EHR, practice management and other systems
- Patient lab, radiology and other outside information interfaced directly into your EHR
- Sophisticated patient matching, record locator and data management services
- Front-line helpdesk support
- Offsite back-up for your EHR
- Streamlined electronic communications using mhin messenger
- Bi-directional interface can deliver your practice's clinical records to authorized users

benefits

- Improves care: Digitized information enables you to trend data and to use alerts based on clinical information
- Saves time: Vastly reduces time needed for scanning, interface testing and monitoring
- Saves money: Experienced staff and economies of scale significantly lower your interface and scanning costs

mhin's unique advantages

- One interface, one connection and one contact for dozens of data feeds from throughout the community
- Local, experienced staff manages your interfaces and data integration needs
- Standards-based interface library considerably reduces your interface expenses
- Dedicated interface team monitoring transactions and upgrading interfaces
- Professionally managed, state of the art data center
- Hassle-free maintenance and dedicated, 24/7 help desk
- A local company dedicated to connecting healthcare in our community
