

mhin pro – professional services to assist you with technology decisions, connectivity and system integration, implementation and training, and local support.

services

- Software evaluation – do you need something new, or can you optimize existing systems?
- Workflow analysis and redesign
- Technology assessment, design and implementation – existing offices, new locations
- Software selection – specialty-specific systems, data integration, implementations
- Connectivity - networks and telecommunications, solutions for multi-location practices
- Contracting for software, networks, telecommunications and other technology
- Project management - software implementations, new office set-up and other projects
- Training for Windows, MS Office, reporting tools and other software applications
- Web site design and hosting

benefits

- Improves care: Make sure your systems are meeting your patient care and clinical workflow objectives
- Saves time: Enables you to do your job rather than keeping up with new technology trends and how they can help your organization
- Saves money: Cost effective way to help you with software and technology decisions and save you money in the long run
