# PowerNote Content Features

- Documentation is based on the 1997 Documentation Guidelines for E&M Services
- More consistent in method of charting, resulting in ease of use
- Documentation is intuitive by disease pathway
- Auto Populate portions of progress note
- Charting can be done from the table of contents pane
- Use clinical diagnosis to add to the Problem Profile
- Use Procedure Note to add to the Procedure Profile
- Health maintenance may be documented
- Anatomical drawings
- Documentation choices are determined by patient gender and age, where applicable

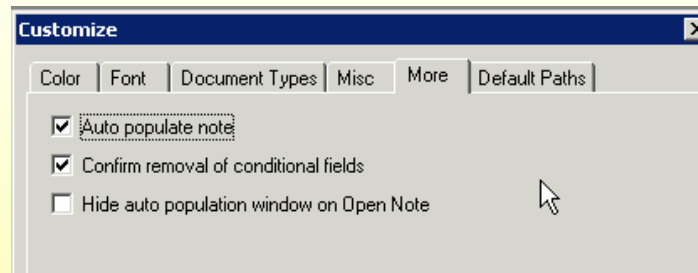

# Catalog View

- PowerNote content is accessible either by search in the New tab or by organization in the Catalog tab.
- Content is identified with the “2G” in the Description column.
- Users may continue to document using the existing custom built powernotes.

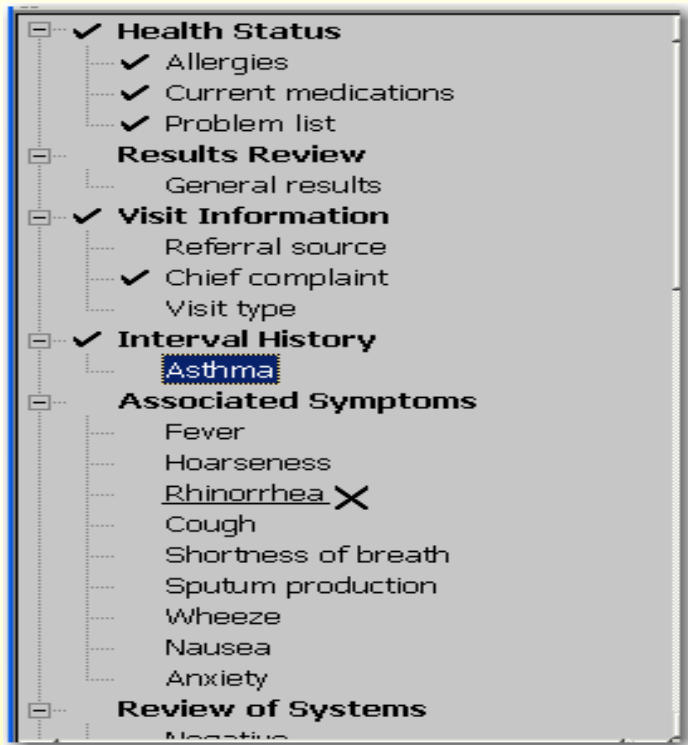

# Auto Populate Feature

- A reduction in clicks!
- Allows for auto population of Allergies, Problems, charted vitals, and point of care tests performed prior to documentation.
- This feature must be turned on by the user.

# Table of Contents Navigation

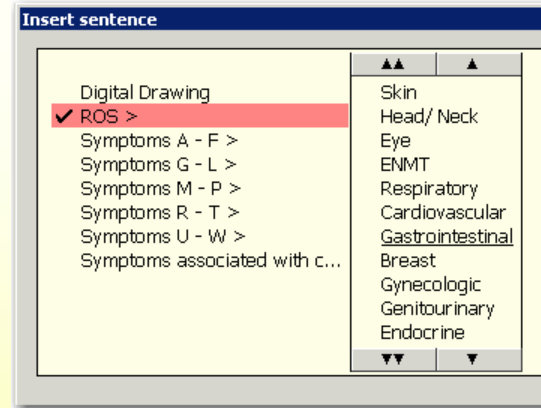

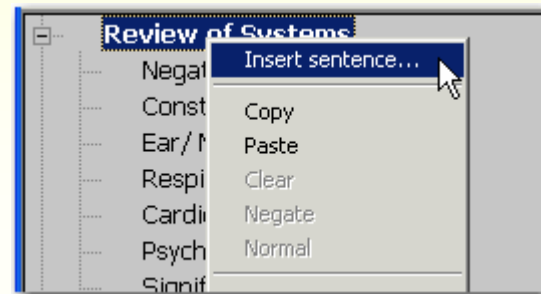

The screenshot shows a table of contents with the following structure:

- Health Status**
  - Allergies
  - Current medications
  - Problem list
- Results Review**
  - General results
- Visit Information**
  - Referral source
  - Chief complaint
  - Visit type
- Interval History**
  - Asthma**
- Associated Symptoms**
  - Fever
  - Hoarseness
  - Rhinorrhea X
  - Cough
  - Shortness of breath
  - Sputum production
  - Wheeze
  - Nausea
  - Anxiety
- Review of Systems**
  - Negative

- The notes are created from the table of contents.
- Navigational clicks available are the “+”, “x”, and “-”.

# Insert Sentence

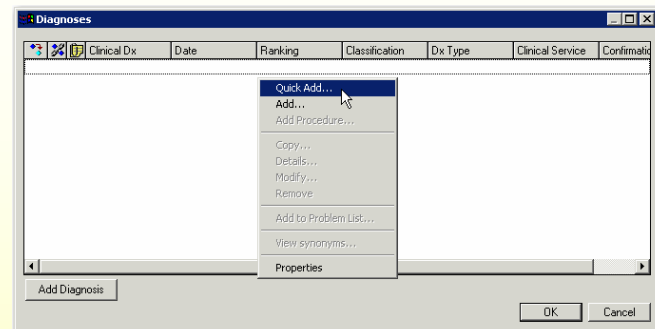

- Used for documenting additional patient complaints not included in the original disease path.

# Clinical Diagnosis

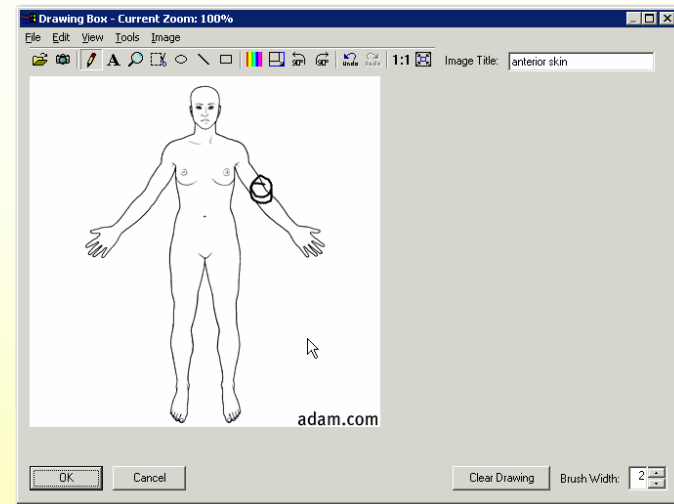

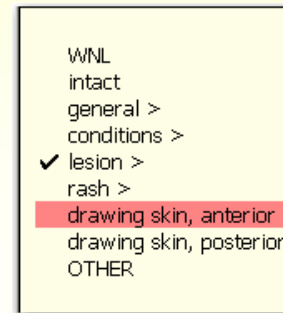

- Diagnoses may be associated to the encounter by selecting from the choices list or by utilizing the Other Diagnosis search.
- Once added to the note, the diagnosis can be added directly to the Problem profile with a right click.

✓ Diagnosis >	Asthma 493.90 >
Orders >	Bronchitis 490 >
Course >	COPD 496 >
OTHER	Emphysema 492.8 >
	Pneumonia 486 >
	Other >
	OTHER DIAGNOSIS
	OTHER

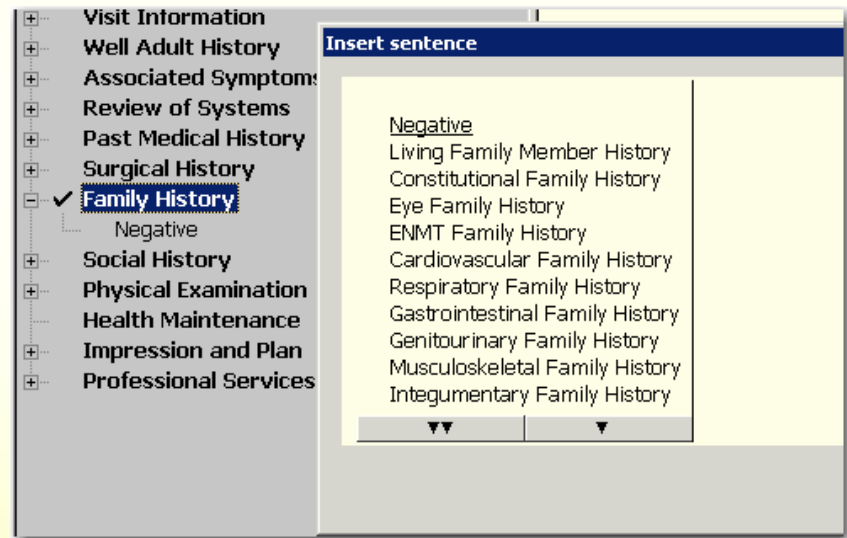

# Anatomical Drawings

- Add illustrations to further document conditions.
- Can “scribble” on illustrations to identify condition.

# Documenting History

- Past Medical, Surgical, Family, and Social History may all be noted as “Negative”, or sentences may be added to document.

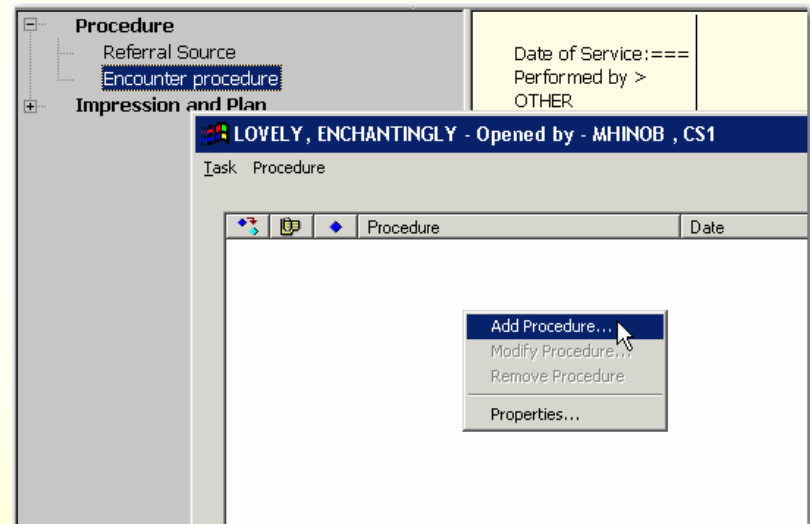

# Health Maintenance

- Health Maintenance is available for manual entry from the table of contents.
- The user must insert a sentence to document.
- Adding information in this area will not flag the user for future visits.

The screenshot displays a software interface for health maintenance documentation. At the top, a menu titled 'Physical Examination' is open, with 'Health Maintenance' selected. Below this, two 'Insert sentence' dialog boxes are shown. The top dialog box lists age groups: '18 - 24 years', '25 - 64 years' (selected), '65 and older', and 'Future PEDS HM'. The bottom dialog box lists various health maintenance items: 'Immunizations >', 'Screening >' (selected), 'Risks/ Unsafe Exposure >', 'Counseling >', and 'OTHER'. The right side of the bottom dialog box lists specific items: 'height', 'weight', 'blood pressure screen', 'assess for problem drinking >', 'breast exam', 'colorectal cancer screening >', 'lab >', 'mammogram', 'osteoporosis screening', 'Pap test', 'PPD skin test', 'rectal exam', and 'OTHER'.

# In-House Procedures

- Procedures can be documented during the visit.
- Using the “Encounter Procedure” note allows the user to add to the Procedure Profile from within the note.

# Document Types

- A comprehensive list of new document types were created for use with the Cerner content.
- Client sites should develop internal policies to ensure consistent use.

# Questions?

- Please contact the MHIN Helpdesk, either by:
  - A PCO message to “MHIN, Helpdesk, or
  - An e-mail to [Help@MHIN.com](mailto:Help@MHIN.com), or
  - Call us at 574-968-1018
    - All issues from SJPN users will be referred to the Technology Learning Department of SJRMC
